Welcome to Inflight Fitness, a U.S. designer and manufacturer of commercial strength training equipment.

In-Flight Products was founded in 1991 as an aircraft parts manufacturer and entered the fitness industry by producing OEM parts and complete machines for a major fitness company. In 2001, Inflight Fitness was launched as its own brand with the acquisition of the Pacific Fitness SE line of commercial strength equipment.

Today, Inflight Fitness combines the quality demanded by the aircraft industry with over twelve years of experience manufacturing commercial fitness equipment to bring you the exceptional value of the Platinum Series.

The Inflight Fitness Platinum Series is engineered to be durable and easy to use while providing great workouts. You will find the Platinum Series is well designed to fit your exercise needs, to fit your most limited spaces and also to fit your budget.

Inflight Fitness compact multi-function strength trainers are in use in gyms, hotels, studios, schools and government facilities across the United States and around the world in countries such as Dubai, Egypt, Ireland, Singapore, Malaysia, Indonesia, China, India, Mexico, Canada, and the Philippines.

## features in all platinum series machines

1

Extensive use of 1" shafts and ABEC rated ball bearings at exercise pivots assures smooth movement.

2

All frames feature 2" x 4" attractive flat oval tubing electrostatically powder coated a rich platinum color that complements modern cardio equipment.

3

We use Loos USA 4000# rated cable with corrosion resistant stainless steel swaged ball ends for safety over 4 1/2" ball bearing pulleys for smooth quiet operation. Cable tension is easily maintained with the cam washer above the weight stack.

4

All machines come with easy to understand exercise placards.

5

Non-absorbent UV resistant closed cell foam grips are finished with machined aluminum grip caps to prevent wear while looking great.

6

The optional shrouds are .040 thick steel powder coated with a mar resistant texture black.

7

Seat and back pads are 40-45 durometer HR foam contoured for comfort and lumbar support with sewn vinyl covers for a tailored look.

8

Our cast steel weight plates are warranted lifetime against breakage. They move on 1" rubber capped floating guide rods with self-aligning plastic bushings and rubber weight stack cushions at the base to reduce noise.
